Feature Description Document

Editing Device Settings from IXM WEB

Purpose

This document outlines the process of editing device settings from IXM WEB.

Applies to

TITAN	TFACE	TOUCH 2	SENSE 2	MERGE 2	MYCRO
All Devices	All Devices	All Devices	All Devices	All Devices	All Devices

Description

Proper device management is crucial in large deployments with hundreds of devices to avoid confusion. Users can edit various device information such as Device Name, ID, Group, Comm Mode, Ethernet and Serial to manage the individual devices as per their requirement.
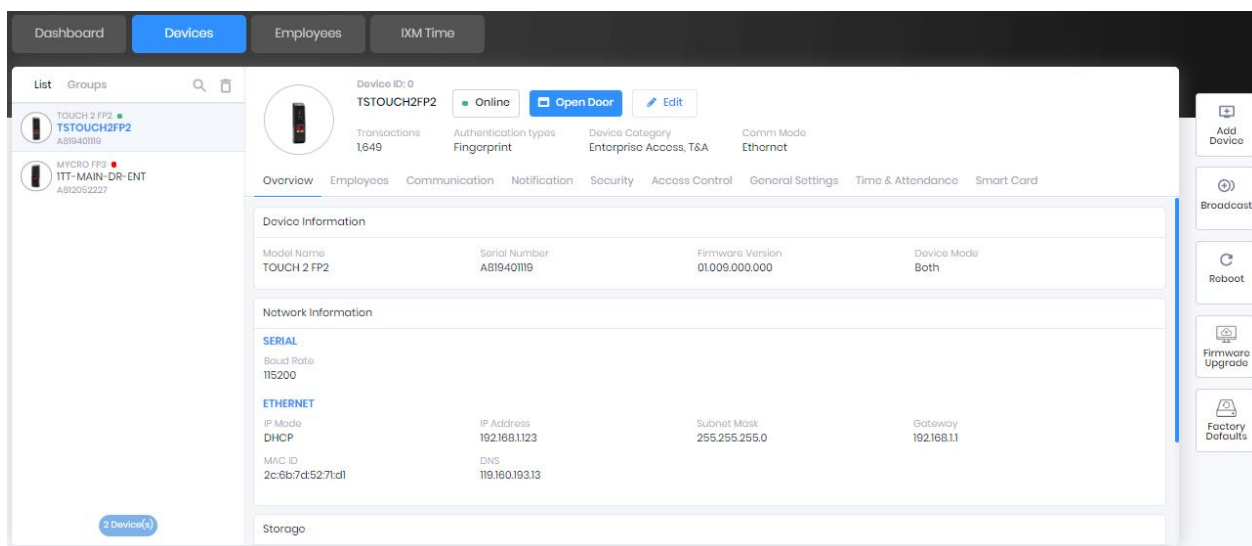

User can edit the following fields using the IXM WEB Edit app:

- Device Information Section

  - Device Name

  - Device ID

  - Device Group

  - Comm Mode
    - Ethernet
    - Secured Ethernet
    - Wi-Fi
    - Secured Wi-Fi
    - VPN
    - Secure VPN
    - Cellular
    - Cellular Secure
    - Serial

- Device Mode
    - Entry
    - Exit
    - Both

- Enable or Disable T&A Device

- Network Section
    - Ethernet
        - IP Address
        - Subnet Mask
        - Gateway
        - Port

    - Serial
        - COM Port
        - Baud Rate
        - Serial Mode

    - Wi-Fi
        - IP Address
        - Subnet Mask
        - Gateway

Edit Device Settings

1. From Home >> Click the **Devices** tab on the top >> Select the required device that needs to be edited from the Device List.

2. Click the **"Edit"** button towards the top of the Device window. The application will redirect to the device edit window where users can update the Name, Device ID, Device Group and Comm Mode.

3. The network section allows updating details regarding Ethernet and Serial communications using which the device communicates with the IXM WEB.

4. Enter the valid details and click **Save**.

5. Upon completion of the process, the application will display the updated device information.
