

# **Feature Description Document**

Identifying Firmware Version from Device LCD

1

#### Purpose

This document outlines the process of how one can check the device firmware version on Invixium devices with an LCD Screen.

# Applies to

| TITAN       | TFACE       | TOUCH 2     | SENSE 2     | MERGE 2     | MYCRO       |
|-------------|-------------|-------------|-------------|-------------|-------------|
| All Devices |

# Description

Firmware upgrade is a very important and critical feature for embedded products. However, before the user performs the device firmware upgrade, the user needs to check the current version of the device firmware.

For Invixium devices this can be done directly from the device LCD. For other devices this should be done via IXM WEB.

# Check device firmware version

1. Tap the launcher button on the device LCD. This will show a list of applications on the device.

- 2. Swipe to the General Info application and tap on it.
- 3. Enter valid credentials and tap **DONE**.

4. Tap on "Device" which will show the device information page which will display the firmware version of the device.

| ← Device Inform               | nation | ↔ 🐨 📉 1:02 PM |
|-------------------------------|--------|---------------|
