

MEXSO

BERN, SWITZERLAND

Media Excellent Solutions (MEXSO) came accros Inxium at the Integrated Systems Europe show and selected IXM TOUCH to secure their own security solutions showroom in Switzerland's capital city, Bern.

Modern Smart Office Automation For An Inviting Showroom In Switzerland

MEXSO founding partner, Boris Schürmann, discovered Invixium at ISE, the world's largest AV and System Integration exhibition held in Amsterdam every year in early February. He was instantly intrigued by the elegant design but also the endless possibilities and use cases for smart office automation as a result of the clever integration with Control4. Eager to experience this modern technology for himself, he proceeded to order an IXM TOUCH X-series for his own quaint showroom in Switzerland.

Modern Biometric Security Featured In A Security Installer's Showroom

Located outside of the capital city of Bern, MEXSO operates as a total technical solutions provider. Prior to their discovery of Invixium, the MEXSO team had previously installed a competitor fingerprint biometric product at the entrance of their showroom, which operated on antiquated RS-485 communication protocol and cumbersome programming. The team ended up replacing the competitor product with an IXM TOUCH FP2X. The wiring was quick and easy due to Power-over-Ethernet (PoE), and the Composer programming a breeze due to the integrated driver. The IXM TOUCH is now used to trigger the Alarm System, Lighting and Intercom in the contemporary showroom.

PROBLEM

MEXSO's previous solution for access control and integrated security proved to be ineffective thanks to an antiquated communication protocol and rigid programming that limited its integration capabilities.

SOLUTION

IXM TOUCH caught Schürmann's attention by speaking to his technophile nature. IXM TOUCH offers a high level of security via fingerprint biometrics, and all Invixium products are engineered for scalability and integration. At MEXSO, IXM TOUCH integrates with the company's alarm system, lighting and intercom to create an incredible security experience that truly shows what Invixium can do.

"We are very happy with the IXM TOUCH X-series in our showroom. The installation experience with Invixium product was extremely easy and the Control4 driver made the process even easier. I would definitely recommend Invixium products for homeowners and business owners looking for modern and convenient access technology."

Boris Schürmann, founding partner and project manager at Media Excellent Solutions (MEXSO)

BENEFITS

- The Invixium solution's integration capabilities allowed MEXSO to fully customize their security system to meet all of their needs with one intelligent device
- Biometrics, such as the fingerprint features offered by IXM TOUCH, promise the highest level of security possible, a very desirable feature for a security integrator's showroom
- The design of Invixium products is intentionally elegant and rugged, meant to fit in wherever they are deployed: from showrooms like this one to more rugged environments

YOUR TRUSTED PARTNER IN BIOMETRICS

Headquartered in Toronto, Canada, with presence in India, Middle East, UK, USA, Latin America and Africa, Invoxium manufactures touchless biometric security solutions utilizing face recognition for access control, workforce management and smart building automation. Their fully integrated hardware and software solution provides meaningful analytics to enterprises and industries for increased health, safety, productivity and security.

With 1000s of products sold in over 60 countries and deployments at major enterprises and industries across a broad spectrum of verticals, Invoxium strives to provide industry-leading biometric solutions that are not only visually stunning, but also intuitive for ease of use and install. Invoxium products are proudly Made in Canada.
