

MARA TECHNOLOGIES

TORONTO, CANADA

Mara Technologies is an ISO 9001-certified Electronics Manufacturing Service Provider in the Greater Toronto Area. Mara was founded in 2004 to service mid-to-high volume customers. The company's facility is 40,000 square feet with 5 full SMT lines and state-of-the-art equipment to handle a wide range of beginning-to-end manufacturing. With a staff of 100, accurately tracking time and ensuring staff health during COVID-19 became a challenge.

Mara Technologies, a Leading Electronics Manufacturer, Relies on Invoxium for Healthy Time Tracking

COVID-19 forced Mara Technologies to re-evaluate every process, including time tracking, to support the need to keep employees healthy at work. As a trusted provider of manufacturing services, Mara's focus is providing quality products on-time as a trusted partner for their customers. This focus means that unplanned shutdowns or shift quarantines were unacceptable. This re-evaluation created an opportunity to improve time tracking speed and accuracy along with safeguarding employee health, so Mara sought a new system that offers touchless clockins, health screening, and digital record-keeping.

Touchless Biometrics and Health Screening Improve Time Tracking Workflows

IXM TITAN with Enhancement Kit is Invoxium's premier solution for employee and visitor health screening. A thermal infrared camera combines with IXM TITAN's on-board 21 MP face recognition camera to simultaneously screen a person's temperature while they complete face recognition for workforce management or access control. Mara Technologies installed two devices at their worksite for time tracking because of the unmatched speed, accuracy, and convenience this solution provides. Combined with IXM WEB, Invoxium's enterprise-grade software for device management, and IXM Time, the addition to IXM WEB specifically designed for workforce management, Mara enjoys simple, accurate time tracking and health screening with a digital audit trail.

PROBLEM

Management at Mara Technologies needed to rework the company's time tracking system to combine daily health screening with clockins because of COVID-19. Because of this opportunity, management also wanted to improve the system with better speed and accuracy and add a digital audit trail to facilitate payroll calculation.

SOLUTION

IXM TITAN with Enhancement Kit and IXM WEB with IXM Time were selected because of the solution's end-to-end time tracking and health screening capabilities with Invoxium's easy-to-use software. Two IXM TITANs were installed to provide Mara Technologies employees with simple-to-use face recognition for time tracking and touchless automated temperature screening.

BENEFITS

- Automated biometric time tracking and temperature screening speed up the process of clocking in and screening employee temperatures, so people can get to work faster.
- Touchless biometrics limit the number of surfaces touched to track time, which reduces the potential spread of illness at work.
- The time tracking data tracked and analyzed by IXM Time helps management make smarter decisions about employees, shifts, and more while improving the ease of payroll calculation.

"Partnering with Invoxium helps streamline entrance screening for employees and visitors. Improvements we experienced after installing TITAN include faster shift changes, more effective payroll management, and a happier, more productive staff."

As the future continues to change, we know that an easier time tracking process can help us adapt when our customers demand it. Getting to work easily is critical to staying productive as deadlines shift and supply chains tighten. We're pleased that our Invoxium workforce management system supports our long-term vision."

Peter Schmied, President and COO at Mara Technologies

Covid-19 Employee Screening Questionnaire

1. Do you have any of the following new or worsening symptoms or signs?
Symptoms should not be chronic or related to other known causes or conditions.

Fever or chills	<input type="checkbox"/> Yes	<input type="checkbox"/> No
Difficulty breathing or shortness of breath	<input type="checkbox"/> Yes	<input type="checkbox"/> No
Cough	<input type="checkbox"/> Yes	<input type="checkbox"/> No
Sore throat, trouble swallowing	<input type="checkbox"/> Yes	<input type="checkbox"/> No
Runny nose/stuffy nose or nasal congestion	<input type="checkbox"/> Yes	<input type="checkbox"/> No
Decrease or loss of smell or taste	<input type="checkbox"/> Yes	<input type="checkbox"/> No
Nausea, vomiting, diarrhea, abdominal pain	<input type="checkbox"/> Yes	<input type="checkbox"/> No
Not feeling well, extreme tiredness, sore muscles	<input type="checkbox"/> Yes	<input type="checkbox"/> No

2. Have you travelled outside of Canada in the past 14 days?

☐ Yes ☐ No

3. Have you had close contact with a confirmed or probable case of COVID-19?

☐ Yes ☐ No

YOUR TRUSTED PARTNER IN BIOMETRICS

Headquartered in Toronto, Canada, with presence in India, Middle East, UK, USA, Latin America and Africa, Invixium manufactures touchless biometric security solutions utilizing face recognition for access control, workforce management and smart building automation. Their fully integrated hardware and software solution provides meaningful analytics to enterprises and industries for increased health, safety, productivity and security.

With 1000s of products sold in over 60 countries and deployments at major enterprises and industries across a broad spectrum of verticals, Invixium strives to provide industry-leading biometric solutions that are not only visually stunning, but also intuitive for ease of use and install. Invixium products are proudly Made in Canada.
