- Adapt to new technologies for comprehensive functionality
- Get a quote based on a high-level scope of effort
- Be ready to witness the unmatched quality and superior performance

Why is Customization a Right fit for you?

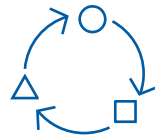

After putting in significant effort to build your business, why compromise on a biometric solution that falls short?

Invixium boasts an extensive history of delivering customizations that give our clients the ideal solution to their real-world problems. At Invixium, our goal is to provide customers with superior engineering and extreme flexibility in the solutions that we offer. We understand that every business has its own set of security and stability needs and with our biometric solution customizations, we guarantee exhaustive functionality and robust control to our clients.

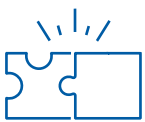

Determine the gap

You rely on a legacy software program for your security database

Adapt and Adjust

Your security infrastructure requires adding specialized security measures like a breathalyzer to your access control system

Fill the gap

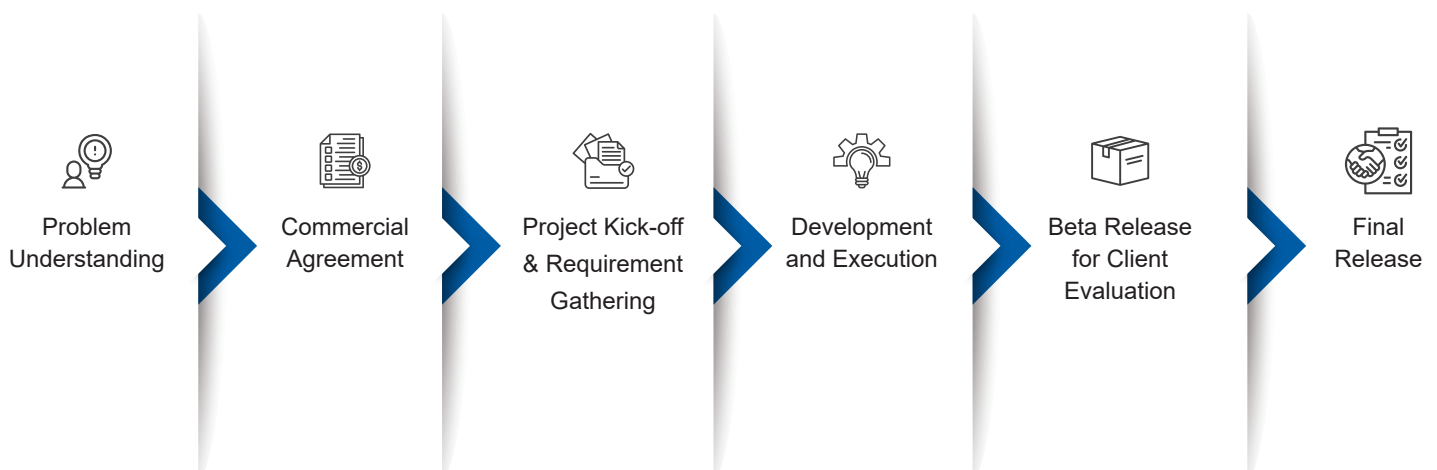

You want to switch from cards to biometrics or from one biometric solution to another

Attain Superior Outcomes

We use our decades of industry expertise to create customized and sophisticated solutions that make your security stronger

How do we work?

What do we bring to the table?

Address all scenarios

Custom integrations with a variety of HR, access control, or security software

Unparalleled Support

Assistance migrating from one biometric system to Invixium

Top-Tier Technical Expertise

Expert engineering to customize our biometrics

Supreme Guidance

Support of Invixium experts with over 200 years of collective experience in the industry

What do you get?

We look at every aspect of your security and workforce management needs and develop customization that is the answer to all your concerns. We listen to your requirements, address all the gaps, determine the best way forward, and engineer a supreme solution that ensures complete satisfaction.

An excellent biometric solution

Tailor-made for your unique business needs

Personalized Solutions Deployment

Implementation of your solution that aligns closely with the specific circumstances and objectives

Remote or in-person support

These are the people who know your customized solution from the ground up and will provide you with all the support to help you get started

Knowledge transfer

We provide a comprehensive download of the entire customization process to your team so that they are better equipped

A delightful customer experience

Our topmost priority and strength lies in providing a delightful CX at various touchpoints in the customer's journey from initial contact to post-sale interactions

Pricing

Customization pricing varies depending on the scope of work. A PCD will be authored by Invixium and signed by all stakeholders. If there is any change in scope of work, additional charges may apply.
